

Zaid Abid

A highly motivated individual possessing a tremendous amount of positive energy. I have hands-on experience in different programming languages and frameworks. I am keen to learn new frameworks and work on new platforms. My school provided a multicultural environment, therefore I am able to professionally communicate with people from different cultural backgrounds.

Machine learning/deep learning/NLP

Achievements/Tasks

- Title: E-Starter
- Description: E-starter is a web-based application and a website that helps individuals to share their ideas with the world.
- Purpose: This application has two portals. In the entrepreneur portal, people are guided to share their ideas on the application. In the investor portal, the entrepreneurs will be able to crowdfund and invest in ideas they find interesting. We aim to connect people with the ideas and the potential investors.
- Frameworks: MySQL, Firebase, Django, python, Flutter.

PROJECTS

Sales Insights Data/Business Analysis Project (05/2023 - Present)

- Our case study is based on a computer hardware business which is facing challenges in dynamically changing market. Sales director decides to invest in data analysis project and he would like to build power BI dashboard that can give him real time sales insights.
- I have performed data analysis using Mysql and PowerBI. I have performed ETL functions and also visualization.
- https://github.com/Zaid8970/Sales_Insight_Data_Analysis/tree/main

Data/Web Scrapping (04/2023 - Present)

- "Dlook" Website Scraped Data I have scraped the entire website from my customer. The following are the project outcomes:
☐ Scraped huge amounts of data from the website(1+ Million).
☐ Used the latest technologies e.g. Selectolax, Selenium, Pandas, Requests to extract the data.
☐ Data was organized..
☐Website Link:<https://www.dlook.com.au/>
