PRODUCT & PROJECTS

1. Paynomix (<https://www.paynomix.com/>)

Paynomix is a program designed to give transaction power back to abstractions so your teams don't need to stitch together disparate systems or spend months integrating payments functionality. They'll be able to create and edit invoices and sales receipts on their computer, laptop, or smart device with either our online or desktop. They'll be able to process swiped or keyed transactions and immediately update your accounting software across the board.

Technology Used: .NET Core, Dapper, MS SQL, Mongo DB and Stripe (Payment Gateway).

2. Atoms ERP System

Developed and implemented new ERP systems where higher authorities can manage System Settings, Lookup, Languages and Modules. Administrator can show modules according to User Roles and also Designed the work Flow to automate the request.

Technology Used: React with Redux, .NET core, Oracle, Bootstrap and Dev Express Report

3. IBEX. Web Dialer

Its Online portal where managers of call center manage Clients, Break Codes, Controllers, Routing Queues, Campaigns, Programs and can also monitoring each activity of Agents calls.

Technology Used: React with Redux, .NET core, My SQL Workbench, OCID Client and bootstrap

4. Dynamic 365 (Finance and Operation)

Interacting with business analysts to understand the customer requirement adding custom features created custom entities, labels, columns, custom attributes based on their requirements. Adding new columns in reports. Adding comment and also resolve BPs according to Microsoft requirements.

Technology Used: VS D365, Remote server, X++

5. MagicBooking (<https://www.magicbooking.co.uk/>)

It is an online portal where parents, school and different organization manage children activity like Clubs, Wraparound Care, Trips. I have designed the admin panel where user create activity and assign schedule, Location, registration and Setting options. Create digital signature for getting signature of parents.

Technology Used: .Net Core 3.0, Angular 8, LINQ, Bootstrap, ngxSpinner.

6. Awesome CMS (<https://www.designyoursite.net/>)

ACMS allows you to control and manage the content in your web site. Using this ACMS system you can very easily add, delete images, changing page layout and edit text in your web site. You can add unlimited pages and Add menu as you can.

Technology Used: MVC5, MS SQL Server, Bootstrap, KendoUI and CK Editor.

7. Awaaz

Awaaz Mobile app increase the sales, checking the correct placement of your product in-store or checking if the right product is up-sold and in an instant, you can get customer feedback.

Technology Used: .NET Core, Angular 6, SyncFusion GRID, MS SQL Server and Stripe (Payment Gateway).

8. Shield/Capture (<https://www.shields-e.com/>)

Marketplace brings the ultimate pricing efficiency to telecom operators in maintaining their networks, handing the control of pricing back to the telecom operators and providing the tool needed for increased profitability in this highly competitive market.

Technology Used: Angular, .NET Core, Yarn, Gulp, Material, Angular UIgrid and MS SQL Server.

9. **CP Creative** (<https://cpcreative.co.uk/>)

CP Creative Ltd offer a range of services that are aimed at a complete property marketing package. also offer services to estate agent, property developer or landlord to promote his properties.

Technology Used: C#, ASP.Net, Cashflows API (**Payment Gateway**), Calendar.IO, JTable, ITextSharp and MS SQL Server.

10. **Client Portal** (<https://softportal.thinkdigitally.com>)

Client Portal is basically integrated from of Jira for client use. where he can see the progress of working tickets and uploading files and commenting on tickets which show on Jira.

Technology Used: C#, ASP.Net, Jira API, TinyMce, FileZilla, GitHub, SourceTree and MS SQL Server.

11. **PandL** (<http://www.pandlmasonry.com.au>)

PandL is an Australian based construction company who are not only confident bricklayers but have experience in many other areas of building such as form working, concreting, carpeting, and core filling and provide all tools of the trade.

Technology Used: C#, ASP.Net, ITextSharp, Jtable, TinyMce, FileZilla, GitHub, SourceTree and MS SQL Server.

12. **Task Management System** (In House)

Create a project, add team members as you want, assign tasks and follow your employee. Each task holds space for all the information you need to successfully complete it. Discuss the details of the job with your team members, upload files, set due dates and add checklist items.

Technology Used: C#, .NET MVC 5, Bootstrap DataTable, Google Map and Gmail APIs, GSM and MS SQL Server

13. **Canteen Management System** (HBL, MCB and National Food).

CMS software has been designed as a user-friendly system that facilitates quick and efficient operation to cover large section of employees by using his Finger Scanning. This software has also paperless and almost cashless transaction.

Technology Used: C#, Windows Form, SQL Dependencies, Crystal Report, SQL Server Agent Jobs and MS SQL Server.
