OBJECTIVE

As someone who is able to give a project greater value, faster delivery, lower costs, improved operational efficiency and having a strong understanding of contractual procedures, seeking a Software Developer position at company that boasts an impressive portfolio of projects under its belt.

SUMMARY

- Good systems-level thinking, problem solving skills and balance thinking about big picture and small details.
- Empathetic Software Developer.
- Good team player having goal-oriented instead of self-oriented mindset.
- Having work experience in both remote and On-Site scenarios.
- Always stay in my toes, expanding my knowledge.
- Ability to switch contexts or the scope of a project unexpectedly, and then go back to pick up where I left off.
- Able to adjust to the needs of business or product when they change.
- Able to adapt and respond to issues when they arise (almost always unexpectedly and often time sensitive).
- Personal traits: dependable, flexible, friendly, hardworking, expressive, formal, punctual and being a team player
