Haseeb Ullah

Senior Software Engineer at 10Pearls
Islamabad

Summary

Software Engineer

I am a full stack developer having almost 5 years of industry
experience as a back-end and a front-end developer. I am
well aware of working in a Scrum/Agile software development
environment.

I have an expert level of JavaScript working experience with a
knowledge of how JavaScript works under the hood. As a front-end
developer I have worked in the latest JavaScript frameworks (i.e.
AngularJS, Angular, React). I have also experience in designing
responsive pages with HTML, HTML5, CSS, CSS3 and bootstrap
framework.

As a back-end developer, I have worked in a variety of back-end
languages and frameworks i.e. C# (.Net Core, .Net framework),
Python (Flask), Node.js (ExpressJS). In a variety of projects, I
have implemented different programming concepts (i.e. Multi-
Threading, Authentication, Authorization, Logging, Exception
Handling, File Handling) and different software architectures
including Microservice.

I have also experience in working with relational databases (i.e MS
SQL Server, MySQL), writing complex queries, views and store
procedures as well as with non-relational databases (i.e NoSQL,
MongoDB).

I am a quick learner and always open to learning/explore the latest
tools and technologies.

Experience

10Pearls

Senior Software Engineer
March 2021 - Present (11 months)
Islāmābād, Pakistan

Synergy-IT Pakistan
