Ali Raza

Software Engineer at Confiz

Pakistan

Summary

Dynamic and creative software developer with over 2.5 years of
experience
in developing performance-oriented scalable system. Eager to
support the
development team as a collaborative team member, with top-notch
coding
skills.
Smart working professional driven to increase team effectiveness.
Focused on usability and performance improvements. Proven history
of
developing useful, efficient and cost-effective projects. Quickly learn
and
master new technologies and working in both team and self-
directed
settings.
Prefer to work in a competitive and challenging environment where I
can serve my organization to grow and improve myself.

Experience

Confiz
Software Engineer
February 2022 - Present (2 months)
Lahore

SIXLOGICS
1 year 3 months

Software Engineer
December 2020 - February 2022 (1 year 3 months)
Lahore, Punjab, Pakistan

Dotnet Developer
December 2020 - September 2021 (10 months)
Lahore District, Punjab, Pakistan

• Working on multiple Asp.Net web projects with MVC design patterns and also worked on REST APIs

• Improve existing features by writing robust code for better performance, high scalability and easy to maintain in longer run.

• Have also developed a project from scratch in Asp.Net Core MVC with SQL Database. Backend is design using layer Architecture by creating different layers like Data Access Layer which communicate with Database, Business Logic Layer to implement system's business etc.

• Have experience to write robust Store Procedure for fast and secure Database operations, worked on both Dapper and Entity Framework ORMs

• Participates in team meetings to discuss the system design and architecture, and schedule tasks accordingly so that complete our sprint in time.

• Perform regression and system-level testing to verify software quality and functionalities prior to release.

Devnym Technologies
Full Stack Web Developer (.NET)
April 2019 - November 2020 (1 year 8 months)
Lahore, Pakistan

Works on "6Seconds an Emotional Intelligence Project" as a Full Stack Web Developer (.NET) . My job is to add new features and update existing ones while collaborating with my team members in Lahore and abroad.
I have hands on Asp.net 4.5 and asp.net core 3

Freelaning
Android Application Developer
February 2018 - January 2019 (1 year)
Lahore, Pakistan

I develop professional Android applications having flexible UI . Works on applications which uses API's , Fire-base and MySQL database.

COMSATS University Islamabad
Final Year Project
June 2018 - December 2018 (7 months)

Autonomous Car (Academics Final Year Project)

An autonomous car, also known as self-driving car, is a vehicle that is capable of sensing its environment and moving with less or no human input. It is currently developed on a Robot having motors connected with wheels and a battery, thus demonstrating a prototype.

The system processes the images from camera installed on the car, a trained Model (Convolutional Neural Network) detect the road and vehicles from the images and Ultrasonic sensors detect the other objects. As a result, the system takes actions accordingly to either stop the car, slow the car, or overtake the objects if there is a way.
